

Before BCV5™

After BCV5™

No More Db2 Headaches or Stress!

Refreshing target Db2® data stores for Test/QA can be inefficient and tedious. BCV5 has intelligent, automated technology that delivers data in a fraction of the time and the manual efforts of existing processes. Refresh and/or Mask data at the click of a button.

Relax, Let BCV5 Do The Busy Work!

BCV5™ is a **very fast** copy/refresh, migration, and cloning tool that copies DB2 z/OS® databases, tables, et.al with full consistency. It has smart automation, structure handling and **enhanced data masking** capabilities. BCV5 surpasses TDM, Cloning, and Unload/Load based processes in performance, timing and ease.

What Do Customers Say About BCV5?

"BCV5 works exactly as expected. Easy setup, fast repeatable refreshes. It has made refreshing test subsystems simple and error free." DBA, *State Agency*

XDM™ is our full featured Test Data Management tool for distributed systems and mainframe including: DB2 LUW, Oracle, SQL Server, DB2 z/OS, IMS®, VSAM®, et.al. It has copy, subset, cloning, full **masking** capabilities and test case selection (within or across different DBMS'). All of this in one easy to use interface.

See our website for more mainframe & distributed solutions:

- Automated Test Data Management (BCV5 / XDM for DB2, Oracle, SQL Server)
- Fast DB2 Table Refresh/Migrate (BCV5)
- Cloning for various RDBMS' (BCV4 / XDM)
- DB2 Buffer Pool Tuning/Alert (BPA4DB2)
- DB2 Log Analysis and Auditing (ULT4DB2)
- SQL Performance (SQLQC)
- CICS® App Performance APM (ICPU)
- Mainframe Cost Optimization
